

FOR IMMEDIATE RELEASE:

SEPT 14th, 2020

PERATON TO BE PLATINUM SPONSOR OF #UC20REMOTE

OTTAWA: Unmanned Systems Canada / Systèmes Télécommandés Canada is pleased to announce that Peraton has signed on as the premiere sponsor for this fall's global conference and exhibition.

#UC20Remote will be a virtual gathering, bringing together experts in the unmanned sphere from around the world. The new format will provide an exceptional conference experience with access to all the keynotes and speakers online and on the device of your choice.

“We’re thrilled to have Peraton on board as our Platinum Sponsor,” says Declan Sweeney, USC-STC’s Executive Director. “The support from Peraton will help ensure #UC20Remote will be the kind of high-end, high-value event that attendees have come to expect.”

Taking place around the same time as the physical conference, USC-STC’s online schedule will be November 3 - 6th, 2020, adding a day to handle the expanded content and shorter hours each day.

“We’re proud to support Canada’s unmanned sector as the Platinum Sponsor for this event,” said Greg Nelson, Director, Peraton Canada. “USC-STC is the voice of this rapidly evolving sector, and we are pleased to have the opportunity to partner with UC20Remote and spotlight the growth and opportunities in the industry.”

USC-STC will also provide a platform to showcase project SkySensus, Peraton’s research and development project to advance the use of Beyond Visual Line of Sight (BVLOS) – a critical component of the unmanned commercial and defence applications of UAS technology. The objective of project SkySensus is to drive advancements and innovation of unmanned systems operations, big data analytics, airworthiness standards and training. It brings together Alberta-based small businesses; Canadian

UAVs (Detect and Avoid Technology), AERIUM Analytics (Data Analytics and Automation), and Foremost UAS Range (Regulatory Compliance, Test and Evaluation).

For 18 years, USC-STC has mounted an annual Conference and Exhibition for the unmanned industry in Canada. The gathering brings together manufacturers, operators, regulators, academics and more to discuss the latest trends and research. Due to COVID-19, the decision was made for the 2020 gathering to be virtual.

“With the support of Peraton, we’re looking forward to this being a milestone event in USC-STC’s history,” says ED Sweeney. “We could not have hoped for a more committed partner, and we’re grateful for Peraton’s participation.”

About USC-STC

Unmanned Systems Canada / Systèmes Télécommandés Canada is the national industry association representing entrepreneurs, businesses, student academia, industry, and government organizations working in the aerial, ground and marine remotely-piloted and unmanned vehicle systems sector.

About Peraton

Peraton supports innovative next-generation cooperative military advancement to the defence and aerospace industry. As a trusted partner to Canada’s defence community, Peraton supplies world-class mission sustainment solutions through its In-Service Support and Integrated Logistics Support capabilities. For more than 35 years, Peraton has been a dedicated partner to the Canadian Armed Forces and is Canada’s only prime contractor for the sustainment of avionics systems, electronic warfare, and automated test equipment on a fighter platform. Headquartered in Herndon, VA and employing over 3,500 personnel worldwide, Peraton is a trusted provider of highly differentiated space, intelligence, cyber, defence, homeland security, and communications capabilities.
